Hello.

I've been playing on cloud since almost 10 months ago, and last week i've had tried to download 3.4.4 scripts.

okay, it installed correctly. but when i enter the game, it crashes after some seconds i enter any server.

BigCello helped me, telling me to re-install renegade, the 1037 patch and the 3.4.4 scripts, but still didn't work.

anyone can help?

Thanks.

did you install it with shaders or bloom?

Does it happen when you join any other Renegade Server or offline, in LAN, Multiplayer Practice or Single Player?

No, i didn't installed the shaders, neither bloom. ONLY the scripts.

and Yes, it's in Multiplayer. on the MPractice i didn't tested yet, and Single Player blows up when i install Ren. Resurrection.

and if it does matter, i installed some skins.

Try re-installing and only updating to 1.037. And check if you can play online like that without crashing.

i can't play online only with 1037. my multiplayer internet doesn't work, that's why i use Ressurrection.

Might wanna start with getting an official version of the game instead of that filthy torrent?
