For a server to work on XWIS it must have;

A valid XWIS serial number which is not banned
A valid XWIS username
The correct password for the XWIS username

It must not;
Share a serial number with another server
Share a username with another server or player

You can check its username is OK by logging into XWIS with the username and password you have given it, if you can't see any servers then the username and/or password are invalid.

Hmm that's new. I used to run 2 servers on the same serial. Ofcourse Renegade itself aswell.

Yeah, I wasn't 100% sure on that one but it doesn't hurt to try and avoid reuse if your having issues
