Hi Renegade-X players!

Since the succes of our previous event on 20 July we thought it would be a good idea to schedule another event for all the people that couldn't make it or just really like Renegade-X and want to play on another event

Okay! When will all of this cools happen?

The event will start on Sat. 30 July 2011 at about 8PM Dutch time. You can use this timezone converter to check when the event will start in other timezones.

Server information

Server IP: 109.230.246.231

Server Port: 31337

Server Name: RenegadeXServer.com Slaughterhouse #2 Ranked (EU)

Specifications: Intel i7 8x2.93GHz, 8GB Ram, 1GBit

Website: <http://www.RenegadeXServer.com>

Forums: <http://forums.mp-gaming.com/forum-537.html>

I'd like to play, but what is Renegade-X exactly?

Renegade-X is a (currently) modification/add-on for Unreal Tournament 3 and can be played for free (if you own UT3 that is). It sets the Renegade Command and Conquer Universe on the UT3 Engine where you can play with a large range of Infantry and Vehicles in warfare where you must destroy the enemy base.

That sounds like fun! Where can I download it?

You can download Renegade-X over here:

<http://renegadex.game-maps.net/index.php?act=view&id=6>

What do I need to know about the installation?

Since Renegade-X is a MOD for Unreal Tournament 3 you'll have to make sure it is installed and updated with the latest patches. After that just run the installer of Renegade-X and install it in the default directory. Otherwise you may encounter some troubles.

Does the game require me to install any updates for it?

Yes, but this is all done automatically for you. After you've installed the game just run Renegade-X. There should be a shortcut on you desktop. It'll prompt there's an update available.

In some rare cases it is possible that the Updater (and/or Renegade-X.exe itself) does not function properly or crashes. In that case you can download a newer version of the executable over here: <http://www.renegade-x.com/sc/updates/Renegade-X.exe>

Overwrite the existing file and launch it, the problem may be resolved now.

I tried everything, I can't get the game to work

If you are still experiencing problems you can post on the Renegade-X forums over here: <http://www.renegade-x.com/forums/forumdisp...chnical-Support>

Move out!

Alright we hope to see you on our server! Last time we had at most 11 players and we're hoping to get a few more this time

I'm gonna post this because the Renegade-X ServerList appears to be broken and i am unsure if it will get fixed before tonights (or tomorrow for some of you) game.

If it appears that the serverlist is down, ie: no servers appear on the list at the left side of your screen.

1--- Click PLAY OFFLINE

2--- Wait for the game to fully load the menu

3--- Press F10

4--- Type: open 109.230.246.231:31337 and then press enter

5--- The game will join the RenegadeXServer #2 EU server and you can play

your links are broken fyi

edit: i guess it could help if I told you how. you might want to try removing the quotation marks in your url tags

Yea but i figured i'd post an alternative way to join the server just in case

And only 2 more hours and we gonna play
