Try following this tutorial to connect to WOL/XWIS:

http://www.renegadewiki.com/index.php/Registering_a_nick_on_XWIS

You can also use a program to connect via the GSA list, download this program called RenList from here:

<http://www.mediafire.com/?9yuotvptyn44g4y>

After opening it, configure the GSA settings and you can join servers listed on the GSA tab. Joining servers on WOL with that program doesn't work correctly.

Wow pirating a game and wanting to play online?

You can't play online without a valid serial.

And with valid I mean one that is valid, not banned from XWIS and not yet used by someone else

You can play with invalid serial on XWIS. Just nickname under which you want log in need to be registered on valid serial via control panel.

Thus you still need a valid serial
