hey ppl i have been using RR for years now but some days ago started to crash everytime i leave a game, i use v 1.1.7 alpha (108), i love RR but this shitty crash is getting me angry lol , so i thought in leave here a crashdump in case anyone have interest in look in it:)

<http://www.megaupload.com/?d=WYZVUY8W>

Also, i cant change the resolution duno why.

why your posting RR crash on mod forums?

try use 3.4.4 without rr

well after some test i discovered that the problem are the scrips 3.44, every time i install the scripts the game becomes lagy in singleplayer as in multiplayer internet and when i leave from an online game it display an error, sadly i havent been able to retrieve the error info, becuse everytime i close the error disply window it get deleted from temp folder soo.. any ideas? scripts 3.44 use to work perfectly fine some days ago.
