^, not the ones in the data files that are unused but the sounds that the game uses.

Yeah, it seems to be yo1.wav, now just need those other two sound names.

thanks guys

Seems like message.wav is used for both public and team chat, unlike with RR.

yo1.wav is used for private messages.

Thanks once again, I'm gonna release a small and quick sound pack for both to replace them with slightly amplified versions of public\_message.wav and private\_message.wav respectively
