Hello people

UberAOW Development Website

We are looking for people who want to help us test our new serverside mod called UberAOW.
UberAOW is a modification that adds some extra's, commanderstuff, powerups and new crates to the game.
The goal is to create a nice mod that is fun to play while not breaking the original gameplay of the game.

If anyone is interested in joining up for our test team then please join on our irc at
irc.mp-gaming.com in the channel #mp-aow
