When I try and throw Remote C4 and Mines in sequence, they do not go when I click the button the first, second, even sometimes fifth or sixth times. I never have a problem firing weapons in squence, just remote C4s and mines. This is a pain when I make it into the enemies building and I don't have much time to place the charges. I see others drop the charges really quickly. I do not think it is lag as in many games there is not much lag and this happens to me all of the time. Any sugestions?

When placing C4 i always double click the left mouse button *just* to make sure it does place... it can sometimes be lag that stops you from placing it instantly.

I get that sometimes with the Zoom on the sniper rifle, if I quickly zoom in and out a few times. Similar to the PIC sound effect it stops working if you keep firing over and over...
