I've played through the single player version of the game like 2 times now. I would like to have all weapons cheat for single player and how to activate it... It would make it a bit more fun... lol so if anyone could tell me how to do it i'd appriciate it.

download the golden god mod (dunno where to get it anymore) then all the weapons should be in a pile on the 2nd level. u can also jump really high and run really fast. the mod wont work on multiplayer though
