For some reason today when st0rm crashed earlier, i tried rejoining any 4.0 server and now its saying i am banned for having "BARN001.w3d as well as ACK\_BARFLAG.w3d, which i am guessing came from Fjord somehow. I cannot seem to find either of those w3ds in either the my documents folder or renegade/data folder, so i am stumped as to where it's all located.

Try moving Fjord out of your Data folder, see if that helps.

Tried removing fjord, but it seems to not be the case, and why i posted here, is because no matter what 4.0 server i join it gives me that anti cheat kick and i cannot join based on having Barn001.w3d and Ack\_Barflag.w3d

Seems like it is reading from C:\Westwood\Renegade\ttfs\files and there is already 922 files within that folder which are all .dds or .w3d files. Something is wrong with the way it reads from the data apparently.

Those files are in FieldTS.
