Okay, so you know the bog-standard problem with TFD (win7, Ultimate)

But it doesn't work. I've changed my registry to the game.exe path, and still no presets appear! Is there anything else i can do? Thanks.

Are you running scripts 4.0? If so you need the 4.0 version of Level Edit.

Registry-Key:

HKEY_LOCAL_MACHINE\SOFTWARE\Wow6432Node\Westwood\Renegade\InstallPath

needs to be adjusted like this:

C:\Program Files (x86)\EA Games\Command & Conquer Die ersten 10 Jahre\Command & Conquer Renegade(tm)\Renegade\

The Problem is the "(tm)" with TFD.

If the presets don't show up, the path within the registry is wrong.

Thanks for the suggestions, but rrtuk, i've ALREADY tried that, i said didn't i?

I'll look into the newer le though... I do have S4

Okay so great... I have this new Leveledit.

But it says something about a missing Serial.dll?

I know this is to do with it looking for the wrong registry but how do i fix it? I do have the Wow<somethingorother>Node then Renegade then the serial key is there, but i have no Software->Westwood folder. Only the WowNode.
