[View Forum Message](#) <> [Reply to Message](#)

I've registered with the Renegade-X.com forums. It said a email confirmation would be sent, which I haven't received with in the 12 hours I've registered. Otherwise I would be posting the next question in the Renegade-X forums.(Yes i check the junk folder)

Can anyone give me the latest download link for Renegade-X mod for UT3? I can only find .55 or .552, and .555 is the latest one right? Please give me the link to the latest RenX client!

Thanks!

Knight

I've already downloaded that one. Then i start it up once its installed. It asks to update, then I click update. then a small window appears for 5 seconds then disappears. Then the RenX Client comes back and it asks to update again. Its in an endless loop to update but never does!

why this message is at mod forum?

[View Forum Message](#) <> [Reply to Message](#)

I don't think it is at their end.

You're better off joining their IRC channel if they have one and getting a direct answer from them, search their forums for the IRC info.

1) [renegadeXserverlist.jpg](#), downloaded 1166 times

Hi. I'm the guy who built that window tankclash posted a picture of. So you say you downloaded 0.55 and it keeps updating non stop? It should only update 3-4 times. Open the folder in windows where you installed the game to. Then open the logs directory and the newest log txt file then paste that here.

Also try. Logging into the renx site without the confirmation email. If that still doesn't work for you try having it resent and check you spam folder. If that doesn't work I will talk to an admin for you.

I finally got it to update to .555. Now the servers won't show up at all. Before I updated I noticed there were 3 servers, refresh button is now stuck on "Refreshing". I've installed UT3 3 times, installed RenX 3 times. Even downloaded Steams version of UT3 to see if that will get RenX to work.

As for the RenX Forums site. I'm not sure where to go to get another email confirm sent? I logged in with my RenX login but doesn't let me post at all.

It does it for me too. I fixed this issue which is caused by a few ISP's firewall-routers not allowing the request to specific ips which times out the frontend.

try replacing the frontend EXE with this BETA frontend exe:
http://www.renegade-x.com/sc/updates/0_5_5_6/Renegade-X.exe

Tell me if that fixes the server listings not showing up.

Yeah that Renegade-X.exe shows servers now. For the newest front end to work you said its the ISP/Router blocking it? What Ports does it use? I could open some!

Also again with the Renegade-X Forums...

This is what I get when i try to post a new thread/reply, and still no email confirm link sent to my email....

CMPSKnight, you do not have permission to access this page. This could be due to one of several reasons:

1. Your user account may not have sufficient privileges to access this page. Are you trying to edit someone else's post, access administrative features or some other privileged system?
2. If you are trying to post, the administrator may have disabled your account, or it may be awaiting activation.

Thanks halo2pac

I have no idea which ports, all I know is that it works everywhere else but my house. it works on my laptop at my uncles house, it works for the owner and 90% of the renegade-x users. and when I debug it with visual studio it says connection timed out... so its just a logical conclusion.

And you say you still didnt get that email? You checked your spam folder?

yea i finally got the email. and it was in junk folder. and yes i looked there when i first signed up for renx forums. the date it was received in my email as 10/26/2011, 6 days later after i signed up for renx forums lol.

I guess let me know if you find out what ports it uses! Thanks again for the help halo2pac!
