Looking for a good FDS bot, please name at least 3! Also, name 2 that are modded already(Client Side, Server side).

I know BRenbot is out there..and CS. Whats the coolest/most up to date CS bot out there also?

Please  
Thanks!

TBH I think BrenBot is the best, it is very easy to work with imo.

for TT: Brenbot only, other are privately or not supporting TT, not sure if NR/CS can work with TT, so i can't say.

for older: Brenbot, Nightregulator, CloudyServ, YALB, YARR, OnOeS.

ps: I'm using my own bot for TT. (the bot is private only)

I stopped working on public releases for CS bot. I have a working one for TT, but I just been so occupied to even get around cleaning up the code and releasing it.
