Restarting your computer usually fixes that bug.

What OS are you running, and could you try installing http://www.microsoft.com/download/en/details.aspx?id=5555 ? What's the issue you're getting with the uninstaller?

i am runing win xp sp3, i think Microsoft Visual C++ 2010 cames whit TT if i am not wrong. I got an issue that when i execute uninst.exe it says game directory not found, and when i execute uninstll.exe the clasic uninstall window pop up for a sec and then it just desapear, like the uninstall proces would be finished but doesnt delete any files, anyway i deleted everything and reinstalled like 4 times but no luck, perhaps you missed something or it is just my PC who dont like your installer lol, anyway hope this feedback could be usefull for you.
