I downloaded Renegade for GamySpy, and when i want to play Multiplayer practice, it doesn't let me click on the option, so i try to play on multiplayer internet or w/e and when the gay is loading on the map it says, "Game Pending", it doesn't load, ive waited an hour for it too load. What is the problem?

Was there anyone else in the server? If you are the only player in the server it will say Gameplay Pending until somebody else joins the server.

I don't understand. You downloaded the game through a torrent or something? It's strongly suggested you just buy the game. It's like \$5-10.
