How do you change the font in game? Specifically the personal message? The dark blue sucks. I think Renegade Resurrection offered a violet color that was nice.

Also, thanks to the new scripts...you can hear music in game. Is there anyway I can add more music in my directory somewhere, or replace some songs?

i dont know about the songs, but you can change the color of the PM text by editing TT.ini or hud.ini(in case you are using soulhunter's hud).

assuming you are running 4.0 beta 3, you need to edit hud.ini for these settings.

I am using the latest scripts yes.

I have a TT.dll file, but not a TT.ini file.

I have no hud.ini file

Where are these things? o.0

hud.ini must be located inside your data folder, if you are using soulhunter's hud, go to data folder find hud.ini open it whit a text editor like notepad, find this section which is at bigining:

PrivateMessageRed=0
PrivateMessageGreen=0
PrivateMessageBlue=255

and replace the values to this:

PrivateMessageRed=0
PrivateMessageGreen=120
PrivateMessageBlue=150

Not data but My Documents -> Renegade -> Client. Create a hud.ini file there and paste the following into it for pink colour.

[General]

PrivateMessageRed=255
PrivateMessageGreen=100
PrivateMessageBlue=192
