I keep trying to play online but no servers are shown.
Renegade is Freshly reinstalled so no extra unneeded files are added (followed the 9 steps aside from scripts 3)
I've fully updated Renegade
with CP1 and 2
With TT

The message of the day says:
To register my nick (for some reason i can't SS the menus with Print Scrn)

I've registered to both XWIS CP and Strike Team forums
What did i do wrong?

Edit: Issue solved itself with no additional effort on my part

Thats because they decided to mess with your head, by making it save screenshots automatically. They are saved in some obscure location within your My Documents folder.
