This plugin adds various measures to the FDS to prevent people doing so called 'flaming C4'. All C4 placed on friendly units are automatically disarmed, Proxy C4 placed on empty vehicles are auto-disarmed too and a few limits have been added to the amount of Remote C4 and Timed C4 allowed stacked on top of each other or on neutral vehicles.

You can contact me under the nick iRANian on [renegadeforums.com](#). Thanks to Xpert for finding an issue where C4 on Purchase Terminals got disarmed.

Changelog:

v2:

-Fixed a bug that caused C4 placed on Purchase Terminals to be disarmed.

To install, place 'FlamingC4Prevention.dll' in the root FDS folder and add an entry for it in SSGM.ini under [Plugins]. Then at the bottom of SSGM.ini add:

[FlamingC4Prevention]

; Messages used by this script:

PageMessage = Your C4 has been automatically disarmed by the Flaming C4 prevention script.

TimedC4LimitMessage = You placed too many Timed C4 on empty vehicle(s), your last one has been disarmed.

RemoteC4LimitMessage = You placed too many Remote C4 on empty vehicle(s), your last one has been disarmed.

TimedC4StackedMessage = Your last Timed C4 has been disarmed, please don't place C4 on top of each other.

RemoteC4StackedMessage = Your last Remote C4 has been disarmed, please don't place C4 on top of each other.

;How many Timed C4 are allowed to be attached to empty vehicles per player?

TimedC4Limit = 3

;How many Remote C4 are allowed to be attached to empty vehicles per player?

RemoteC4Limit = 6

;Total Timed C4 that are allowed to be stacked (i.e. placed on top another C4) per player

TimedC4Stacked = 2

;Total Remote C4 that are allowed to be stacked per player

RemoteC4Stacked = 2

;How long to wait in secs after C4 creation before activating the flaming c4 check

ActivationWaitTime = 2

Nice, the only thing I don't like is that it also disarms the Proximity C4s you've placed on the base. So if you're the base miner of like 40 mines, and you flame c4 your vehicle, all your mines are gone.

That shouldn't happen, I'll look into it. Thanks for reporting.

I can't reproduce it, the only thing I notice is that if you're on the mine limit and you place a Proxy C4 on your Buggy, one of your mines will be disarmed because of the limit and two seconds later the Proxy on the Buggy will be disarmed, but not all the mines you laid.

You might want to allow us to choose which vehicles can have flaming C4.

You might want to add support for something like this:

exceptions:

GDI_MAMMOTH_TANK

REMOTE C4 ALLOWED: 5

Found a little issue. If you toss a c4 on your own purchase terminal, it gets auto-disarmed. Which sucks because if you're trying to save your AGT on Field and there's a bunch of techs in your AGT and you toss a remote to kill them, what if it lands on the PT and it disarms

Nice catch, I'll add code to do an exception for PTs, please report any further issues.

Uploaded the plugin to Beta 5. I haven't tested it but it should work. All I did was change things like Is_C4 to As_C4GameObj() so that it accepts it.

EDIT: Removed file. Look at Iran's first post.

I will wait to take a crack at this, because xpret already tried to update it, so I will give him a chance to fix it before I take a look at it.

I was just reading the first little bit of the topic post. This could be excellent if put on Jelly. There are still people who use flaming units and this would stop them from doing it.

u should make it so PPAGE sends out a custom coloured message + another sound (that isn't the page sound) if you run custom scripts because 95% of the time the bot is PPAGE'ing me to tell to me that some faggot team donated me 50 credits

Uploaded v4, it fixes a crashing bug that I debugged based on a crashdump that Anomiski provided. I don't know how to reproduce the crash itself but I do know it crashed because I didn't handle a null pointer.

This plugin MAY be causing crashes. We had it disabled for a few days then turned it back on and had a crash within the hour. Then another crash, and another... Disabled it and haven't had one for the rest of the day.

Weird thing is that Iran says it is crashing in TT.dll

There are a few things causing crashes in tt.dll. That I have noticed.
