Quote:World Top Secret: Our Earth Is Hollow!

Could the earth, moon, planets and stars all be hollow bodies?

Amazingly, the answer is Yes!

And very likely inhabited within!

i think it's more likely that this person's head is filled with plecospores, but ok

tbh, I think it is hugely possible that some giant leftover spaces exist like massive caverns 1000 times the size of Wisconsin full of liquidy goo and lava. But people? hot women? kings? buildings and UFOs? lol...hope so but think not!!!

Lol, I saw this a few days ago. Friend posted this to me. As ridiculous as this is, it's entertaining to read lol. Even though the Tectonic Plates is a theory in itself, we still have evidence on it.

I also find it humorous how people have had "evidence" of going into the Earth and finding other people, lol.
