It's not longer needed. Just get 4.0 and use renlist. Either that or use XWIS, either works.

<http://icefinch.net/>

Download the client version.

Although I'd highly recommend you getting Scripts 4.0 beta 4 as it has alot more bugfixes and is generally superior to RR in every respect.

the best part are the players who used it because it was required on st0rm, then stop using it and randomly play better, like that xren7 guy that can't play for shit

4.0 (as far as I know) implements many aspects of RR into the game, including stopping cheats. RR is obsolete right now, and if you miss/ed the whole server listing thing it had, just use RenList!

after St0rm went 4.0, the entire player list changed...I mean one day you had these hot shits at it and then, completely different nicknames. It was one of the sickest things I had ever seen in this game.

C4Smoke wrote on Sun, 18 March 2012 10:56What happened to HaTe and all does good snipers? They all disapeared as 4.0 came out.

HaTe still is around, and his skill hasn't change since 4.0 has come out. I can also confirm he uses 4.0.

tbh RR wasn't really obsolete in terms of anti-cheat. On a full RR server (clientside & Serverside) most cheats was stopped. (It was recently updated before TT came out to stop the most known cheat).

So why isn't it obsolete now then? Pretty much all fixes are ported and the AC is even better than in RR.

Resurrection stops the same amount of Cheats as 4.0 do, besides that,its way more stable.
