On Turbo Tech DM and on Jelly new maps the !refund command is not working. We can type it, the BRenBot prompts in IRC it is refunding, the specified player get's a PM saying nickname@IRC refunded you #amount of credits but that's all it does. The actual credits never get added.

I thought it was just our server and couldn't really rule out if it was a mistake on my end, but when T0RN (bless that graceful transvestite) reported he had the same thing I tried to install a fresh BRenBot and see if it works. It didn't, so something might be broken by default. It's not really a command that you use often on a default server I imagine, though it's handy for the modified servers I administrate.

Please advice.

Is this refund command part of a plugin? It's not a stock BRenBot command

Thanks for the quick reply. The BRenBot.pm and BRenBot.xml contain the command, so I assumed that it came with BRenBot, but I realize now the plugin folder is a remnant of the older versions, so it is a plugin yes. Both files date from 23th of September 2009.

Part of Brenbot.dll made by Hex for SSGM 2.0.2 (he made the .pm as well).

use the ExtraConsoleCommands.dll 4.0 plugin.

changed !refund command to use GIVECREDITS <clientId> <amount>

Adding this SSGM plugin to your server should fix it (it adds the refund console command), tell me whether it works or not, can't remember if it actually fixes that BRenBot plugin issue..

<http://dl.dropbox.com/u/21865790/RefundConsoleCommand.dll>

Basically, BRenBot.dll is an SSGM 2.0.2 plugin that's installed alongside the BRenBot.dll BRenBot plugin, the SSGM plugin adds the refund console command used by the BRenBot plugin (and it does some other stuff), but as it's an SSGM 2.0.2 plugin it doesn't work with SSGM 4.0.

Trying that now! Thanks, I will let you know.

EDIT: installed the plugin from your link. The FDS shows it loaded, but the problem remains; I don't get credits.

Hmm, does the refund console command work if you use it directly from the FDS?

!fds Refund <ID> <numbers>

Nope, doesn't work. But it is fixed now. Blacky fixed the brenbot plugin.

Download: <http://www.renegadeforums.com/index.php?t=getfile&id=14100&rid=21615>

Have to enable ExtraConsoleCommands.dll in SSGM.ini

Thanks for helping everyone.

That's weird, the plugin works fine for me, I'm directly executing the REFUND command in the FDS console window though.

Basically, BRenBot.dll is an SSGM 2.0.2 plugin that's installed alongside the BRenBot.dll BRenBot plugin, the SSGM plugin adds the refund console command used by the BRenBot plugin (and it does some other stuff), but as it's an SSGM 2.0.2 plugin it doesn't work with SSGM 4.0.

It don't work because the Brenbot.dll console command is "give\_money". And the Brenbot plugin uses give\_money.

"give\_money \$player{id} \$amount"

I thought the console command was "refund" also.

Besides that it works fine. Just tested it.

But messages don't get displayed on new line and you can enter "refund playerid anycharacter" and it will go through. Same with givecredits console command. Guessing just a copy of that. Not that it matters as long it don't crash fds when anything but an int/float is passed to console command.
