Can't find it, remember playtesting this maps year ago, jrpereira made it but I don't think he ever released a non-beta version of it.

Just googled it, cause I was bored, seems he never finished it and he uploaded all of his work to his own website, which is obviously down.

I believe have the last beta since I was one of the ones testing it with the Black-Cell crew. Did a shitton of videos and screenshots showing him all the vis errors Dunno where the original zip file is, but I have the .mix - where can I upload a 15.1 MB file?

Edit: Looks like I also have C&C\_Rome (his infantry-only map), but I can't find that Halloween map or whatever.

Thanks!

C&C\_Rome is on Gamefront. Best hoster is mediafire.com

Well, here it is:

<http://www.mediafire.com/download.php?6dcd7grqkh6h1b>

Also, check out these two archive.org links for the updates and the "I give up" messages from Justin Pereira

<http://web.archive.org/web/20060209054152/http://tiberios.justinpereira.com/>

<http://web.archive.org/web/20071109223952/http://tiberios.justinpereira.com/>

Now if only someone hadn't stolen havoc9826@gmail.com (unless I actually made the account and forgot the password), I could have put both my mediafire and youtube account on that instead of my ancient hotmail account...

That's actually pretty decent looking. I'm shocked to say this. If someone had the ambition, they could clean it up and make it look a lot more presentable.

It actually looks decent yes but the layout is poorly designed.

!vote Aircraftkiller

It's a shame no one hosts the fjord map anymore. Had some interesting games on that epic map.

Nobody hosts it because it's a 4.0 map. Atm, no servers run strictly 4.0. However, I think whenever beta 5 comes out, Xpert was going to start running 4.0 maps again; Crevasse and Fjords. It's been too long since I've played Crevasse... I still think it's one of the best maps in Ren.

Yup, just waiting on Beta 5 which hopefully fixes all my issues that are in Beta 4.

Can you upload it or post it somewhere for download? I lost it when I re-did my computer couple years ago.
