Is there anyway of playing single player after scripts 4 has been installed. My game seems to crash on level 3 when you destroy the power plant or when you try to finish the level.
I've also tried renaming scripts2 to scripts, which leads to Renegade not even starting up.

Any ideas?

Afaik this is fixed in Beta 5, although I must admit that we haven't tested the SP campaign just yet.

Depends a bit on internal testing, but things are looking good so far.
