Ok, you need an SBH with Sniper/Ramjet, a Repair Gun, Remote c4 and Nuke Beacon. Hold GDI in their base with Arties (or Lights) and send the SBH through tunnels. Move the Arties so the AGT shoots at them and send SBH around PP. Place Nuke and snipe Hotwires/Engineers. If Nuke hits, Arties move in and attack Barr so SBH moves to WF. He uses Repair Gun to disarm Proximity c4 at WF and moves in, tossing his Timed c4 and the Remote c4 on MCT. DO NOT DETONATE REMOTE C4. When the Timed c4 goes off, Right Click for Remote c4. Thus the Timed and Remotes go off destroying (if not severely damaging) the WF. If dead, it's dead. If not, Arties shoot it at destroy it. Then continue on to destroy GDI.

So, where is GDI whenever all of this is happening? Letting it happen? I'm for the Might Not work part of this.

every other player is obviously retarded beyond the point of learning how to click a game shortcut. OMFG HOW ARE THEY INGAME THEN WHAT IS THIS FFFFFF

basically, your strat works on the proviso everyone ingame is legally fucktarded.....hence we believe you are legally fucktarded as to make that assumption is ridiculous. Granted 99% of ren players suck ass, your bound to have one person on the team with more than three braincells.

the thinking is sound the artys draw agt fire so no one see's you get it .. once the nuke is placed the hotties repairing from artys have to go disarm or carry on rep either way if they go disarm the artys get to rape wf or agt and if they not disarm the nuke kills pp and bar
