so I am a hotwire / tech and I am putting timed c4 on mct anyway... I put one down and it shows up on my screen that it is placed but on my weapon bar it still shows 1/1 then I place second one it show 0/1 then it reloads to 1/0 I press it again and it just goes to 0/0 but it doesn't get thrown down anymore. This doesn't happen with proxy or remotes just timed.

Happens when you switch weapon too fast after throwing a c4, which naturally with timed c4 and remotes you will.

It happens with remote c4 as well.

First few times it happened I thought I screwed up and ran back in to throw the last c4...
