Admin Message from Host

Connection to server has been refused:
The revision of TT 4.00 you use (based on r4914) is not
compatible with the server (based on r4650). Please
make sure that both you and the server are up to date.

Okay

Were you trying to direct connect to MP-Gaming.com Gamma Stats? I get that same error when

trying to direct connect there.

I will post to help TT out with this one.

It's because the server is running a lower version of your scripts.

You have beta 5

and the server still has beta 4

Because of the way TT works witch is a good thing, it's not back compatible with old 4.0 scripts.

As the above said, this just means the server has a lower scripts version than yours (the only reason it refuses you is because TT changes the netcode, which will most certainly break a client of a different version). If you know whose server it is, maybe nudge them to update it?

Oh haha, I actually noticed that myself, but I figured at least more than one other server wasn't updated yet. I guess I'll go update it myself.
