<&CloudyServ> 08 Good-One-Driver : yeah i am commander
<&CloudyServ> Connection broken to client. 3
<&CloudyServ> Good-One-Driver has left the game.
<&CloudyServ> 14Host: [CS] Current server local time: 05:55:03pm

I crashed but no debug came up?!?!?

What happened exactly when you crashed then? Did any ingame screens or windows messages pop up?

I keep having crashes without any crashdumps showing up. One time I remember the game ended and I crashed.

YesNoMayb wrote on Sun, 24 June 2012 17:41 keep having crashes without any crashdumps showing up. One time I remember the game ended and I crashed.

This has happened to me on more than one occasion (probably around 4 times, if I remember), however no crashdump came out.

Perhaps (one of) you could try the following. Put Renegade in windowed mode, download ollydbg, and start ollydbg as administrator. After it started, drag your game2.exe onto the ollydbg window. Hold F9 for a while, and if it does not work hold Shift+F9 for a while until the game starts. When it crashes (it will likely freeze and the ollydbg window shows some changes), please make a screenshot and send it to me, or if you have teamviewer, see if I'm around to debug the issue.

It is possible that your mouse cursor does not work after it crashed. In that case, first make the screenshot and then alt+tab to ollydbg and press alt+F2. That should close Renegade and reset ollydbg. (So make sure to make the screenshot first.)

It may be somewhat tricky, but I hope one of you will be able to figure it out and send me the screenshot.

Link to ollydbg: <http://www.ollydbg.de/odbg110.zip> (just extract it somewhere)
