The regex in biatch.xml needs to be updated to:

```
<hook event="biatchMessage" regex="\[BIATCH\]"/>
```

The 4.0 BIATCH messages don't prepend a whitespace to "[BIATCH]", which pre-4.0 BIATCH does. The original regex looks for this whitespace and that's why it didn't trigger.

Hm, as far as I know BIATCH never prepended any whitespace?

It definitely has/had a whitespace.

Weird, I wonder where that came from. Ah well, doesn't matter any more I guess.

Still, the original regex should work, because it matches `\s*` which means 0 or more whitespace characters.

It's not working for some reason.

Fixed so that the strings now print a space before [BIATCH]
