All of these crashes were at the end of a game. I can't remember the maps of the first two games but the latest one was on city flying.

Gah, I just finished going through all crashdumps and you post three more! I've put them on the bug tracker and will analyze them soon.

These are graphics related, Saberhawk should look into these. The second and third ones are crashes when the game was shutting down. The first I don't really know.
