You sure it isn't just loading up the files from your database which is why it looks like it's frozen?

Either way here's a link.

What Xpert said: You must wait for XCC to finish indexing your cnc games before you can use it... This can take a while on slower pc's and depends on the amount of cnc games you have installed, like ren, cnc, ra2 etc.

Why does zunnie have that outdated version?

Use the installer for 1.47 here: <http://xhp.xwis.net/>  
In the meantime, let me remind him to update it.
