This plugin will add a console command to the FDS that will allow you to set the deaths count of a player (negative numbers are accepted and work). The following console command is added:

SETDEATHS <ID> <VALUE> - changes the deaths count of a player.

To install place 'SetDeathsConsoleCommand.dll' inside your root FDS folder and add an entry for it under [Plugins] in SSGM.ini.

You can contact me under the nick 'iRANian' on [renegadeforums.com](#)

Just an FYI.

If you play in a server that is connected to the XWIS ladder, using this command will affect deaths in the ladder...
