Edit: Found out servers have an exception list hur dur. Ignore my topic

Reinstalled Ren, found my old Ob model (alters it into the Single Player one) but it seems to be
blocked by the anti cheat. All building models blocked or can exceptions be made?

Old picture from 2009:

Model attached to this post.

Sometimes I facepalm when people are trying to modify certain .W3D files and how many times
topic have been made about this. It can only be allowed if the server owner made a hash for that
particular .W3D file and there is a good reason why modified models are being blocked. You could
make the walls transparant and look trough them. That would be an easy wallhack..
