pretty much the opposite lol

Yeah, no shit. That's why I'm suggesting she only allow trusted servers on the ladder, because modifying ladder points can't be manually detected.

Only allowing trusted servers wouldn't be a huge task to implement, but it would involve extra work to maintain the "trusted" list. :\

servers have different game-play modes. Global ladder should only be on servers with similar settings.

It's not like there are a lot of servers added each month now are there? Probably a lot less than people requesting access to the serverowners subforum.

First off I only put out "2 cheats" which aren't even really cheat at all they are just advantage emitters. And I did get my justice I did get banned, I am unbanned everywhere except Jelly and honestly I don't care about Jelly and don't care about being unbanned there anymore.

How is he a tool, me and mdk are actually pretty good friends and we have no problems, If he is a tool you're a tool for supporting Iran right now g?G.

I server my time, I was banned and I made up for it I made abunch more stuff helping Renegade. But I got banned and did my time, now Iran is doing abunch of exploting and a bunch of other shit and not getting any justice yeah seems legit.

From what I have seen Iran found a bug with the ladder, reported it (in a somewhat comical way) and thats it.

You cheated for years, created beacon emitters which are not skins, they are blatant cheats.

I'm not saying once a cheat always a cheat, seen a lot of immature idiots in Ren become decent players over the years (myself included). But the situations are hardly comparable.

Are you fucking blind, he is making exploits around 4.0. and then goes in game and uses them and crashes servers, not to mention giving it to all his friends to do the same, yeah thats reporting it alright, this yeah he fucking reported it by doing this umm thats sure reporting it. I never used cheats and you saying I used cheats for years is very false.

Cheat: R G H (Never touched)
Model/Emitter: w3d (My beacon emitters)

Cheat is a program used by someone to give them a huge advantage of killing someone ingame, which *cheat name removed*those.

My emitters are not programs they are just that emitters/w3d files, they are only advantage wise because you can see them from a long distance away.

Edit: If me or shit even Shaitan were "Reporting" exploits like this you would all jump on the ban

them band-wagon.

No a cheat is anything that gives an advantage over another player, no matter the scale.

Providing cheats is a massive step ahead.

When you comment on people hacking, your opinion goes out the window faster then Azazel's in my eyes.

This is the exact reason I call you a dildo all the time.

So glitching is cheating, so skins are cheats, iran's exploits are cheats.

So ban the rest of what renegade has then.

Too bad having extra radio commands doesn't give you an advantage over other plays any way you slice it.

Matter of fact your hindering yourself really, you cant have any communication on the team since you all you can see is radio commands, means rushes are harder to organize, also you have to keep pressing the button over and over which is a hindrance, unless you have macro's installed that do it automatically.

So fail logic G1D
