They look rather... empty?

Probably should make sure this isn't an issue when that 17 game pack is released

Most of the servers are always empty but they are there.

My xwis is only showing 4 servers too... Wtf

XWIS crashed and all the other servers require a restart. That's all.

The servers are there, just not showing up to the clients. Think of it like an IRC netsplit. Just restart your server and it will be fixed.

I dont know all servers stayed on without some disconnection at least on my side. Same RC there still play players:

A00000005 RenCorner Marathon (19/50) C&C Field 0/50 DE, LA, TR, DG, BR, SW

Then why it doesnt show restarted servers on that BI site?

When will be all servers restarted you will all see in ren listings and BI site will be without servers
For me it looks like 2 xwis servers Funny

There's like 6 servers online showing up in XWIS and we haven't gone down cause we use WOLProxy (stops the "quitting part" - we remain on in GSA) - we haven't restarted yet cause we have like 20 people in the server :/

WOLProxy *should* reconnect you to XWIS.. that's the whole point of it

Subject: Re: XWIS server listings!

[View Forum Message](#) <> [Reply to Message](#)

no the point of it is defending against attackers

It has to do with the way they restarted it. The original connection never actually broke so WOLProxy has no way of knowing it needs to reconnect to the new instance.

Well, the BI website shows that the connection stayed alive *AND* it could receive data from XWIS. AKA, they screwed up bigtime, again.
