Go into SP.Alt+F4 will open the contol panel.Type "Cheats" and "Godmode", then Alt+F4 again.If all goes well, you will be invincibly.Or you will be cursing at Renegade for closing down.

In others words there are no cheats. In fact the correct extras code has yet to be released, the one out now gives corrupt character names.

Hit ` in a non-laddered game and type "Extras fnkqrrm" But like Mobius said, it gives corrupt names.

Not sure exactly what it does but
extras quantifigon
comes up with "extras enabled" after typing it in the command line
whether that means u still have to type in something else to actually do a cheat i dunno. Am still sifting through the endless dead end cheats out there, as a lot pertain to the multiplayer like fnkrrm/fngrrm. allguns was one that someone said works but be stuffed if i know how.

cheers
