I've just reinstalled renegade because I have a new PC and after I've reinstalled it, I install the latest 4.0.

However every time I want to sign on, with/without auto login, it keeps saying "invalid password".

I know the scripts are nothing to do this, it just randomly happened. Any help?

Create a xwis account.

Register your serial with them, then click the reset password. Use the xwis password on the forum for renegade - problem solved.

I'd suggest you take a look at the stickies before posting.
