30 ping, 30mbit up/15mbit down connection

this is why good snipers don't take sniper servers seriously

<http://www.youtube.com/watch?v=ULjCZX2W1xM&feature=youtu.be>

Checklist:

- Owner rages and threatens to use *cheat name removed* and evade 'mandai style' after being banned from a server for invisihugging (while tmx doesn't allow hugging), nice rage issues! Check!
- Most (ex)-moderators there are known cheaters, Azazel, Mikey, Unatrax, etc..Check!
- Has extreme lag issues for players all over the world...in 2012 after Renegade is more than 10 years old. comparison with 150 ping and 50 players. Check!

I was in there earlier.. SFPS, ping, and KBPS all seemed normal - but I did warp like never before.. Atomix sniper is a lot better imo

I swear that every time I've ever played in TmX I have always lagged non-stop with absolutely no clue why

Atomix Sniper is definitely way better (and also doesn't have no reload, which I find retarded)

P.S. I think I could have done better than you in that video and that's saying something lol

How you could even consider a server with azazel as a mod "playable" is beyond me.

still find it easy to snipe in there even with all the warp

should add no reload to your list, where there's terrible snipers just spamming bullets lol

You should firstly look on your side about hugging and then u can warn someone from other side.
