Played in UltraAOW server, it auto-downloaded a map and played in game.
Exited that server, enter another and got popup block from Anticheat stating MNATR_LIFT.w3d was found...
Found that file in C:\Users\Windows\AppData\Roaming\Renegade\Client\ttfs\files and deleted it.
Was then able to join other server..

Anyone else encountered this?

Not good if servers are injecting suspected cheat files on map downloads...

T

Actual file name found was:7ADBC67F.r_mnatr _lift.w3d

Its a common bug with 4.0 and that file is not a cheat.
Simply restarting your game usually fixes it.

Stop lying you have been caught.

What have you to say in your defence?
