I've been trying to put together a collection of pine trees for the last few months, for some alpine maps I was working on.

Figured it would be a good idea to release a pack so people can start adding them to maps they are making, or even revive some old maps by adding them to it.

Polygon counts are all different ranging from 185-2200. The tallest and bushiest ones are to be used sparsely since they are 2k polygons each.

needs more trees, doesn't have nearly as many as Fjords

(good work though)

Make sure to pick one and cover the map with that single tree, thousands of them, don't rotate any of them.
