I have only played this map a couple times, as it became mainstream while I was on hiatus. A couple of quick Qs; which buildings can you reach with infantry and NOT be struck down by base defenses. I think the HON is accessible, but what else? Thx

Both Refs can be infed with only minor abrasions when infing GDI ref and the Nod Air can be beaconsed with out the obby killing you. If your carful and quick, you can get to WF and kill it. Go throught the right patch and you can kill GDI Barr with out a base defence laying a finger one you. [ January 20, 2003, 12:41: Message edited by: IModx1 ]

**\*\*GDI\*\***HON-go to the opening by the strip and run to the little hole/gap thing on your right, then wait for obby to calm down then haul ass into the HON.REF-Go through the tunnels and down the stairs and go into the back door.STRIP-the tunnel that goes through the back of the Nod base, run over to the side of the strip. Unles you get very lucky, I think you need a buddy to scuicide, that or a 1000\$ unit so it can take 2 hits (luckly nothing will damage you toher than obl) leaving you with red health, allowing Engi's to pistol whip you.**\*\*Nod\*\***Barracks-Go through the tunnel near tiberium that you see when leaving the gap area that allows tank to shoot the strip. Go through tunnels and go into door.Refinery-Go through the tunnels, do NOT stop in it or the ob will hit you, it happened

---

to me. Hop down the stairs and go into the ref back door. Weapons Factory- If your lucky you can make it through the tunnel without dieing, and go in the side door.
