Which version of LevelEdit are you using? I think ttle.dll is only compatible with jonwil's modified version LevelEdit.exe

For the record, LE works fine on my Windows 8 machine, but my executable is hex-edited to work with AR and I don't have a stock one lying around currently or I would send it to you.

i just did get the The Tiberian Technologies mod tools – 4.0 RC1 one o;

the older one what used for 3.4, LevelEdit_Jonwill starts up but it like crashing and stucking any time :/
