Hey guys, im in the process of setting up the biggest downloads site dedicated to Command And Conquer.

Ok i know what you are thinking.. "oh great another fansite" - "cncammo already has a load of downloads"

Its not a fansite, i dislike the majority of fansites, not the people who make them, or the style, but the approach, its all copy and paste and 'community news' - The only fansites are visit regularly are CCU for there different approach to what WS/EAP have done/did/and were about to. And RenGen Cos i respect his site, and he is always looking to get exclusive content.

And yes CnC Ammo has a lot of files, but they dont have the bandwidth, that i can provide, ie its not hosted by gayspy and you dont have to que. n/o to the site, or the webbies.

The games we are concentrating on are RA2/Yuri - Renegade - and Generals. I already have a team for RA2/Yuri and Generals. But we need a team for Renegade.

The site idea, to be a huge collective of files, for easy access, easy to find, and very fast downloads.

When i say we need a team, i dont mean modders, developers etc.. at this moment in time we need people who can write, All the backend coding is done, we need people who can write information on all the files, mostly maps. We dont wanna lift information from the ReadMe, cos there is no point having a great site, the files we need, and the just slap the readme on there, which really only gives a brief on the map. Dont look good eh?

We already have around 100 maps uploaded, and 400 skins, im also offering to host mods like - Renegade Alert and CnCReborn for free.

If you would like to help, please email me england@radiantx.net for infomation, or join #shock on [irc.radiantx.net](irc://irc.radiantx.net) and ask either Shock or Myself for info.

Perhaps a little more specifics for what we're looking for.

Knowledge of HTML (we do not want to have to teach you)
Ability to learn quickly
Good grammar/spelling skills

A little explanation is at hand for some of these. I've coded the backend to be used as easily as possible, and we don't want to have to keep reminding you how to do it. The HTML skill and

grammar skills are required because we review every file we put up. More work for us, I know, but it gives us a higher standard than most.

We'll pretty much take anyone who is competent enough, and of course who we can get along with. We need reviewers for all games (mostly Renegade at this point however), and if you have any skills with PHP I'd be glad to offer you a position, because being the single coder for the whole site is a bit tough

Feel free to email me at shock@technikality.com, or catch me in IRC.

Well we already have the Mod Exchange but ok...

I have a basic understanding of HTML ad I can help you on that part...

If you would like my help e-mail me on the adresess in my signature.

He said good English skills were required also.

I'm not perfekt, thats right but good not means perfekt.

I didn't say perfect, I said good. I could have said crappy-but-better-than-nothing English, and your English still wouldn't meet that requirement.

(btw: perfect | that's | does not | mean)
