i wanted to reinstall renegade but apparently the TT site wont let me download the client  
  
it says network error but i can download the other stuff just not the installer  
  
anyone else has this problem or just me?

Sounds like you may have to disable your AV temporarily.  
Also see <http://www.renegadeforums.com/index.php?t=msg&th=39331&start=0&> . If your AV is not listed there and temporarily disabling it solves your problem, please tell me which AV you have so I can add it to the list

that solved it, didnt think my av would block even before downloading  
  
thanks alot

What AV are you using? Because apparently, we need to contact them. Your description suggests that the AV maker put the URL on a blacklist.

I think he is using Avast as someone reported the exact same issue and that person was using Avast.

EDIT: <http://www.renegadeforums.com/index.php?t=msg&th=40351&start=0&>

At first I thought it was a download fluke or something but it turned out to be the AV.  
Specifically:  
Quote:"Failed - Network Error" (using Chrome) when I tried to download it from the link provided for it.

yes its avast, and i was looking for a way to report the link as non virus but didnt really find one  
i wasnt in the mood to set up a full email for it so i just left it there
