FDS just crashed without generating a dump, but I noticed one from the 14th that I apparently wasn't around for.

After finally sitting down and having a look at these I realize that neither are a result of scripts.dll, tt.dll or shaders.dll crashing...

I would however, advise other server owners or moderators to not attempt to place someone in spectate when a map is loading.

Yup, this one is related to spectate.dll lol.
