Update to work with newer versions of brenbot.
unsure of actual compatibility with br1.53 untested.

```
# FDS Status Reporter plugin for BRenBot 1.51 by Daniel Paul
# Reports the status of the FDS to an FTP location automatically by
# uploading a .txt file. Processing the raw data is up to the website
#
#
# Version 1.05 modified by genblacky br 1.54 B230
# Updated the plugin to use plugin::getBrVersion br 1.53
# Removed backwards compatibility, doesn't use gamelog.
```

Example output log

```
GSA
C&C_Volcano.mix
0
0
1
0
20
0.09.44
63
name NOD 0 0 0 16 0
name2 GDI 0 0 0 20 0
```

Server Status output
serverMode
Map
gdiPlayers
gdiPoints
nodPlayers
nodPoints
maxPlayers
timeRemaining
sfps

Player list output
name side score kills deaths ping kd

Can be used to create something like this

http://kicsigaming.dyndns.org/tmxranks/fdsstatus/

Tested it with 1.53. It makes the file in BR folder but it doesn't seem to upload the file to the FTP

If I recall BRenBot is no longer compiled with Net::FTP by default, which isn't required by anything internal to BRenBot, but is required by that particular plugin. Do you get any errors on your console?

The only thing I get from it when loaded is this

"Loading plugin fds_status_reporter... Use of a tied on a handle without * us deprecated at XML/Parser/Expat.pm line 447"

Install Perl and put that missing modules to Plugin dir in BRenBot.

I think it was some FTP.pm file but not sure. When I will be at home I will look on it.

I fixed problem. My FTP url started with ftp://

Apparently that breaks it so I made it ftp.link.net

Well I can say it works for 1.53 then.

Oh, you're actually using an older version that still has it compiled in I think... the new ones don't.
At least, I think - I don't know what configuration DP compiles BR with. I just know that if you
follow the instructions in the SVN to set up the compilation environment, you don't get Net::FTP
without downloading it from CPAN.

That's why newer plugins that require Net::FTP include it in their zip file / svn directory

Apparently that breaks it so I made it ftp.link.net

Well I can say it works for 1.53 then.

Try extract it to plugins dir maybe it will help with that url issue.

```
File Attachments
1) plugins.zip, downloaded 203 times
```

I've updated the copy on the BRenBot SVN to 1.54 standards and added a copy of net::ftp which can be installed to the plugin directory alongside it.
