Remove any .PKG mods from the Renegade/Data that you may have downloaded recently, then restart your computer.

Will fix it.

As far as I know there is a very simple solution (it works everytime for me):

- * If you wanna play a Mod, restart Rengade and join the Mod directly
- * After that restart Renegade again, and jon only normal mode games

If you play a .mix and the a .pkg the zero bug aperas other way round too if you play a pkg and after that a mix it also aperas.

Try it out, and post if that helps you too.

Easy solution:

Uninstall the RA1 Mod

Worked for me.. i tried restarting renegade after the games, tried rebooting, nope..
Then i delete the mod and boom! no more 0-bug..
