D:\VS2012\Projects\TT41RC2\shared\shared.vcxproj : error : Unable to read the project file "shared.vcxproj".

D:\VS2012\Projects\TT41RC2\shared\shared.vcxproj(36,5): The imported project "D:\VS2012\Projects\TT41RC2\dep\vtune\VTune.props" was not found. Confirm that the path in the <Import> declaration is correct, and that the file exists on disk.

I am getting this error, does anyone know how to fixor this?

Well, i "fixed" it by removing the lines

```
<Import Project="..\dep\vtune\VTune.props" />
```

From the project shared.vcxproj

Dunno if it was left in there by mistake?  
Anyhow, it loads/compiles now.

Probably left over by accident. For reference;

<http://en.wikipedia.org/wiki/VTune>

(I assume that's what it's referring to... not used it myself)

I get this:

```
18>C:\Program Files
```

```
(x86)\MSBuild\Microsoft.Cpp\v4.0\V110\Microsoft.Cpp.Platform.targets(44,5): error MSB8020:  
The builds tools for v110_xp (Platform Toolset = 'v110_xp') cannot be found. To build using the
```

v110\_xp build tools, either click the Project menu or right-click the solution, and then select "Update VC++ Projects...". Install v110\_xp to build using the v110\_xp build tools.

19>C:\Program Files

(x86)\MSBuild\Microsoft.Cpp\v4.0\V110\Microsoft.Cpp.Platform.targets(44,5): error MSB8020: The builds tools for v110\_xp (Platform Toolset = 'v110\_xp') cannot be found. To build using the v110\_xp build tools, either click the Project menu or right-click the solution, and then select "Update VC++ Projects...". Install v110\_xp to build using the v110\_xp build tools.

20>C:\Program Files

(x86)\MSBuild\Microsoft.Cpp\v4.0\V110\Microsoft.Cpp.Platform.targets(44,5): error MSB8020: The builds tools for v110\_xp (Platform Toolset = 'v110\_xp') cannot be found. To build using the v110\_xp build tools, either click the Project menu or right-click the solution, and then select "Update VC++ Projects...". Install v110\_xp to build using the v110\_xp build tools.

Are you using VS2013? If so you need to either install VS2012 build tools or set the toolset to vc120 in the project properties.

If using VS2012 make sure to grab all the updates from Windows update, 110\_xp was added later so that code built by 2012 would work on XP machines

Yep, just make sure you open your solutions in the correct version or the newer versions will convert the old solutions to the new format.
