For any of you using Mozilla as your browser, I've created a sidebar for listing and joining the Renegade/Planetside Teamspeak servers. It's pretty nice to keep track of who's on you favorite server while you're checking forums and stuff. Check out http://phase66.kicks-ass.net/webpost/listing.php and there's a link near the bottom to automatically add it. Let me know how it works for you.

Cool.

His TS is still up though, I'm pretty sure he hosts it somewhere else.

Yeah I really like the webpost as well. It's nice seeing who else is online, and being to drop in and say hi to other clans and such.
