A few people have reported having issues with loading/saving control configs in scripts 4.x. I need someone (or multiple people for that matter) to contact me via IRC/IM so I can work with you to find out whats going on and why its not doing what it should be.

Hello Jonwil, I too have the same problem.

I find that my saved control configuration is deleted when I restart the game. I use a control config for infantry and the default for vehicles with secondary fire (apahce/orca/mammoth etc).

You can contact me anytime on my MSN (marcstarbuzzAThotmail.com). I use Skype to chat using my hotmail account. I see you in my Contact list.

Hope I can be of help.

Added a fix that should solve this problem (thanks Ethenal for the help with diagnosis)
