I have played renegade sense 2004 now that i been win7 home prem. my renegade been closing, i see a popup saying this,, [renegade has encountered an internal error and is unable to continue normally] it is ramdomly sometimes it dont happen for hrs.

Icant upload the debug file because file is to big.

can anyone help?

thx

Compress the dump file in some way and it'll likely fit. Otherwise upload it somewhere like Dropbox. Without the debug crashdump file, *anything* could be wrong and there's no way to tell exactly what happened.
